4th International Tübingen-Symposium on Pediatric Solid Tumors

First announcement

**February 16th-18th, 2012
Tübingen, Germany**

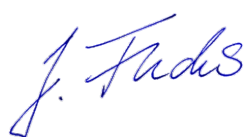

**From bench to bedside in
Neuroblastoma**

Dear Colleagues,

During the past, advances in treatment and outcome of children suffering from Neuroblastoma have been made by European and American multicenter trials. Besides conservative treatment approaches, novel therapies are more and more important. In 2012, the 20th anniversary of antibody therapy in Neuroblastoma can be celebrated in Tübingen. Additionally, the world's first MIBG treatment in Neuroblastoma was carried out in Tübingen. Therefore, we would like to invite you to Tübingen to discuss treatment of Neuroblastoma. The topic from bench to bedside will draw a bow from basic research to clinical treatment approaches and problems. International experts from the fields of pediatric oncology, pediatric surgery, radiooncology, nuclear medicine, immunology, and genetics will be together discussing actual topics of Neuroblastoma. Abstracts may be submitted for all scientific sessions. A master class focussing on the treatment of Neuroblastoma will be offered for all registered residents and other interested participants on February 16th, 2012. Tübingen is known to be a comprehensive center for medical care, research and teaching.

We are looking forward to having you here in Tübingen.

Jörg Fuchs
Professor of
Pediatric Surgery

Rupert Handgretinger
Professor of
Pediatric Oncology

Preliminary program

Thursday February 16th, 2012

Master class "Neuroblastoma"
(free of charge for registered participants)
SIOOPEN Study Committee Meeting (closed)
Welcome reception

Friday February 17th, 2012

Scientific session I:
Pathology
Scientific session II:
Basic research
Scientific session III:
Genetics
Scientific session IV:
Clinical trials
Scientific session V:
Poster discussion
Gala dinner

Saturday February 18th, 2012

Scientific session VI:
Immunotherapy
Scientific session VII:
Imaging
Scientific session VIII:
Surgery
Scientific session IX:
Nuclear medicine / Radiotherapy
Scientific session X:
Stem cells
